BS 9999(2017) : 2017 FIRE SAFETY IN THE DESIGN, MANAGEMENT ...

By taking a more holistic view to fire safety, BS 9999 allows compensatory measures to offset, e.g. travel distances and/ or total escape door width. In a worked example for a supermarket, by following ADB, maximum travel distances of 18 m for egress in a single direction and 45 m for escape in two directions, and a minimum aggregated exit width (after discounting the largest exit) of 7500 mm would need to be applied.
