Cathedral Building As an Expression of Faith. The building of monumental cathedrals in the middle ages was a reflection of faith and the channel for much of the creative energy of medieval European society. Although cathedral building was driven by religious figures or institutions, it was often a community effort.

Cathedral Building in the Middle Ages - Durham World ...

Medieval builders constructed castles and cathedrals largely from cut stone and used quicklime mortar—sometimes to hold the blocks in place, but more often to fill in gaps. Their solid blocks of stone had to fit together with tolerances of less than a quarter inch (5mm).

The Technology of Construction | Encyclopedia.com

Southeast of Paris, France, they are building a medieval castle, using only traditional tools and local materials: stone, iron and wood. They're rediscovering the same methods used to construct...

The term Norman architecture is used to categorise styles of Romanesque architecture developed by the Normans in the various lands under their dominion or influence in the 11th and 12th centuries. In particular the term is traditionally used for English Romanesque architecture. The Normans introduced large numbers of castles and fortifications including Norman keeps, and at the same time monasteries, abbeys, churches and cathedrals, in a style characterised by the usual Romanesque rounded arches

Norman architecture - Wikipedia

Romanesque architecture was current in Europe from the mid-11th century to the advent of Gothic architecture. It was the product of monastic expansion: larger churches were needed to accommodate numerous monks and priests, as well as the pilgrims who came to view saints' relics.

Romanesque architecture | History, Characteristics ...

Many of Yorkshire's medieval castles are now toothsome ruins, but not this one in the pretty Georgian market town of Skipton. Even at more than 900 years old, Skipton Castle is one of the best preserved and most complete in England. This is largely due to 17th-century matriarch Lady Anne Clifford, who took the castle under her wing and set about restoring it after a battering during the Civil ...

In architecture, a gargoyle (/ ˈ g ɑːr g ɔɪ l /) is a carved or formed grotesque: 6-8 with a spout designed to convey water from a roof and away from the side of a building, thereby preventing rainwater from running down masonry walls and eroding the mortar between. Architects often used multiple gargoyles on a building to divide the flow of rainwater off the roof to minimize the ...
