Diesel Engines Marine | Recycled Marine Engines | Fornaes

There are two types of marine diesel engines: four-stroke and two-stroke. Two-stroke process: Air is inserted into a cylinder that pushes out exhaust. When the piston moves to the top of the cylinder, fuel is added, and when the fuel combusts, it pushes the piston down again. Four-stroke process: During the intake stroke, fuel is injected and the piston moves down.

Marine Engines and Generators | Cummins Inc.

Beta Marine was formed in 1987 by four marine engineers who brought to the company a combined total of over 70 years experience in the design, manufacture and marketing of marine diesels. Their objective was to provide propulsion engines and marine generating sets to suit individual requirements rather than to the specification dictated by the larger boat builders.
