Where `~/OpenCV/opencv_contrib/modules` is the `opencv_contrib/modules` path and `~/OpenCV/main` is the OpenCV source directory path. I've found this information in the file `README.md` in the `opencv_contrib` folder:

ERROR using opencv_contrib with Python 3.x - OpenCV Q&A Forum

Supported Python versions. Python 2.7 is the only supported version in 2.x series. Python 2.7 support will be dropped in the end of 2019. Python 3.x releases follow Numpy releases. For example Python 3.3 is no longer supported by Numpy so support for it has been dropped in `opencv-python`, too. Currently, builds for following Python versions are ...

There is a brew formula that has been released about 4 days ago for OpenCV 3.0, you can find it here. The biggest issue is the customizability of the `opencv_contrib` package which now contains important features such as SIFT, SURF, etc. which were part of 2.4.X, but have been marked as optional in 3.0, mainly related to patent reasons.
