First, there is a need to develop competencies and curricula in prevention issues of contemporary importance, including the new morbidities, cross-cultural issues, cost-effectiveness, quality of care, and practice in managed care and other community settings. Second, further work is needed to evaluate programs and measure educational outcomes.

Teaching Prevention in Pediatrics : Academic Medicine

Before COVID-19, scheduling a visit with your children's pediatrician seldom required a second thought. Now during the pandemic, parents may be skipping important pediatric appointments and immunizations - and end up putting their children's overall health at risk.
