In the previous day students completed the PhET Energy Forms and Changes simulation and a modified worksheet downloaded from the site. This is a good introduction to the concept as students can see that energy is different from temperature, and that different substances (brick, iron, water) absorb and hold different amounts of energy to change the same temperature increment.

@chrisklus. I think this is fixed. (1) If you check the Energy Symbols box quickly after the fan appears to stop you typically see an energy chunk and the fan spins again, but this might be because the fan only appears to have stopped spinning when in reality its velocity is not 0. I went and looked at 1.0.0-dev.17 and if you wait ~5 seconds between when the fan stops spinning and checking ...
