A solution package is a CAB file with a.wsp file name extension and a manifest file. You can create this manually by using a tool known as Makecab.exe. But in SharePoint 2010 while developing a solution using Visual Studio 2010 it is very easy to create the.wsp file.

What is a solution package and how to create a solution ...

Early in the project creation process, Visual Studio asks you to decide between using a sandboxed solution or a farm solution. It is worth considering in more detail the difference between a sandboxed solution and a farm solution and when to choose one over the other. Prior to SharePoint 2010, all solutions you could create were farm solutions.

Introduction to SharePoint Development in Visual Studio 2010

If you are new to Visual Studio, you may not be familiar with how “Solution Folders” work. Visual Studio allows you to group together any number of sub-projects that your root solution may contain. However, what is strange about Solution Folders in Visual Studio is that they do not create the same logical structure on your disk. Solution Folders will not create a mirror on your hard drive.
